DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words (The current Abstract is approximately 196 words). It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Claim Objections

2. Claim 11 is objected to because of the following informalities: line 10 Examiner suggests to modify "first a" to --a first--. Appropriate correction is required.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10 and 25-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 1 states "processor readable medium" without specifying whether the medium being "physical" or "logical".

Specification page 7 states:

"The term "memory" refers to any processor-readable physical or logical medium ... the term "logic" refers to implementations in hardware, software, or combinations of hardware and software.

As such, "processor readable medium," if "logical" refers to "processor readable software implemented medium."

Therefore, the claim is directed a "software" (descriptive material) *per se* as recited in the preamble and is considered non-statutory subject matter. (See MPEP 2106.IV.B.1(a)). Data structures not claimed as embodied in computer-readable (physical or tangible) media are descriptive material *per se* and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure *per se* held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention, which permit the data structure's functionality to be realized.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 recites the limitation "the one or more decoded commands" in line 13.

There is insufficient antecedent basis for this limitation in the claim.

4. Claim 8 recites the limitation "the modification processor" in line 2. There is insufficient antecedent basis for this limitation in the claim.

5. Claim 11 recites the limitation "the one or more decoded commands" in line 24. There is insufficient antecedent basis for this limitation in the claim.

6. Claim 20 recites the limitation "the modification processor" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

7. Claims 24 and 27 are allowed.

8. Claims 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. Claims 12-19 and 21-22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

10. Applicant's arguments see pages 7-12 of the Remarks section, filed 1/21/2009, with respect to the rejections of the claims have been fully considered and are persuasive. However, a new ground of rejections has been presented in this office action. As such, any further response to Applicant's argument is moot.
